DENIS FRANCISCI PADOVA/IT

Quantitative Archaeology in Roman Contexts: Some Practical Examples

„Numbers are rarely used in archaeological studies about classical periods (i.e. Greek and Roman ages). This talk will present the application of quantitative methods in excavations and researches concerning the Roman imperial period in the Northern Italy. Through some practical examples, several techniques of statistical analysis (descriptive, multivariate, circular statistics; spatial analyses; morphometrics; etc.) will be showed and their partial or final results will be discussed.“

ZEIT UND ORT

Mittwoch von 16 - 18 Uhr c.t. im FU Topoi-Haus im Hörsaal, Hittorfstr.18, 14195 Berlin

KONTAKT

denis.francisci@gmail.com / undine.lieberwirth@topoi.org / silvia.polla@topoi.org

Mit anschließendem Umtrunk im Restaurant „Luise“, Königin-Luise-Straße 40-42, 14195 Berlin-Dahlem
